

Josh Swenson

Joshua Swenson is a Technical Associate for Cimtech Inc. providing training and support for Mastercam software users throughout Washington, Idaho, and Montana.

Josh has been employed by Kimball International in Post Falls, Idaho since 1996. In this time, he has obtained degrees in both Conventional Machining and in CNC Machining. In 2002, he completed his apprenticeship and became a Journeyman Tool and Die Maker.

Josh was trained by an internationally recognized expert in error proofing and mechatronics, George Keremedjiev. During this training, he was appointed Kimball's Sensor Applications Specialist. Josh has AutoCAD certification (Pacifcad), and is Mastercam CPgM1 certified (Cimtech Inc.). In addition, Josh is the Mastercam in-house trainer for Kimball International. He utilizes all of the previously mentioned disciplines for the development and production of "Point of Use" machines to support the Lean Manufacturing initiative at Kimball. Since 2006, Josh has been an integral team member of Kimball's R&D department, completing over 70 automated machines.

In 2006, Josh started K&D Solutions, a CNC machining and consulting business. K&D Solutions specializes in prototyping and specialty machining, for area companies such as: ISR (Spraycool), Defensive Edge, Lone Wolf Distributors, Detonics, Gillingham Best, TGG Inc., Renegade Metalworks, and Specialty Kawasaki.

"I enjoy working with Mastercam because it is so thorough, easy to use, and can be tailored to anyone's machining style."
