

Tim Martinson

Tim Martinson is Cimtech's Technical Associate in Northwest Washington, demonstrating, programming and teaching Mastercam®. Rick brings 18 years of machining experience to his work. He learned manual machining from master machinist Rick Rudy, and later started his own shop making parts for semiconductors. He used a mill and lathe, programming with Mastercam®. He was a programmer at Edco, and taught machining at Bellingham Technical College. He's currently a programmer at Irongate Machining, Inc. "Mastercam is easy to work with and yet can be used to create the most complex designs. I really enjoy helping others learn how to use it."
